the perceived lack of drug discovery productivity in recent times has led to much debate in the  
pharmaceutical biotechnology industry as escalating r d costs are not being matched by increased  
output few observers doubt that selecting the right targets ie those which are critical to disease  
pathology and are druggable is the best starting point for improved productivity the seven chapters of  
this volume describe recent progress towards drugs acting at a range of druggable targets one chapter  
addresses kinases one covers an ion channel two proteases are featured and three of the chapters cover  
g protein coupled receptors which has historically perhaps been the most fruitful area for medicinal
